

Additional Strobe Light - Ei178

- An additional strobe light for use with Aico Alarms for the deaf and hard of hearing
- Activates on receipt of an alarm signal
- Plugs directly into the strobe alarms auxiliary socket
- Supplied with 10m of connecting cable
- Weather protected to IP67

PRODUCT DESCRIPTION

The Ei178 is an additional strobe light designed for use with Alarms for the deaf and hard of hearing. The strobe can be positioned in an area such as a lounge, hallway or kitchen, where the main alarm may not be seen. This will prevent, for example a fire which started in a bedroom being detected but not warning a deaf person in the living area.

When connected to a strobe unit the additional strobe will flash when an Alarm is triggered. During activation the strobe light flashes on and off until the Alarm signal stops.

The strobe light should be fitted to a wall in a prominent position at eye level where it has the best chance of being seen. The Ei178 comes complete with 10 metres of cable with a plug (JST type VHR-2N) for connection to the strobe unit.

The Ei178 is designed to work with the following Alarms for the hearing impaired:

Ei169/160
Ei170RF
Ei171RF
Ei175
Ei176

TECHNICAL SPECIFICATION

Xenon strobe:	1 Watt, 0.9Hz flash rate
IP Rating:	IP67
Temperature:	-20°C to 40°C
Dimensions:	Product - 72mm x 62mm Package - 150mm x 155mm x 90mm
Weight:	182g
Warranty:	5 year (limited) warranty
Approvals:
